- Automated heating system
- Wood pellets

## 3 good reasons to choose Calore

### Multifire System

The unique, patented, forced ventilation system heats the room faster and distributes heat evenly throughout. You could even turn your fireplace into central heating for your whole home.

### Aluker Lining

Exclusive to Calore, the innovative Aluker panels lining the fireplace increase operational safety and reliability. Not only do you get a higher heat storage capacity, you get brighter flames too.

### Majolica Finish

The handcrafted, durable Majolica ceramic finish is beautiful and efficient. Available in a variety of styles and colours, it is never too hot to the touch. It absorbs and slowly releases heat uniformly.
