

# WALL MOUNTED

## SYMPHONY

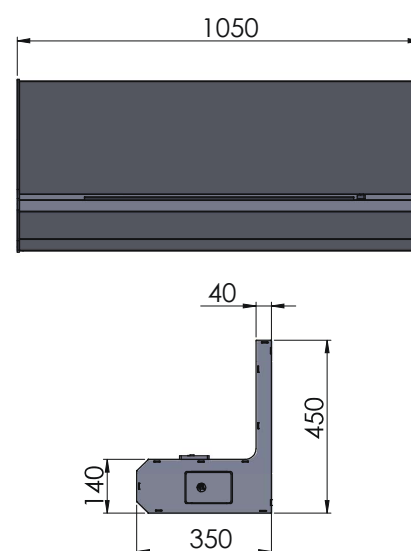

A NEW GENERATION IN HEATING

This sleek wall mounted unit is designed to optimise the reflection of the flames in its brushed stainless steel rear wall, magnifying the effect of the flames for a stunning visual effect.

These units require no messy or costly building work. Instead they simply bolt to the wall and connect to a gas supply, providing an easy and time saving installation.

Our wall-mounted units are designed to be installed on a wall, out of reach of small children, making them an ideal choice for families with young kids.
